A black and white photograph of a mountain peak, likely Mount Everest, with a climber visible at the base. The climber is positioned on a rocky outcrop in the lower left foreground, looking up towards the mountain. The mountain's peak is covered in snow and is the central focus of the image. The sky is filled with soft, textured clouds. The overall tone is dramatic and adventurous.

Yolubari

mountaineering equipment

Boulder, Colorado

1960

Our love of the mountains and our conviction of the joys and values which can be gained from them led us into the mountaineering equipment field twelve years ago. Having had most of our fun hunting, fishing, camping, climbing, and skiing, we have been able to give help and to supply special equipment to many others who have gone to far places of the world or who pack into the mountains of our own country.

The success and fun of your outings stand or fall on whether your equipment does the job or not. The guiding aim behind our efforts for these twelve years has been to provide you with equipment of the best value and quality. As we have striven for better solutions to your problems, we have resorted more to making our own equipment. To the hundreds of you who have taken time to express your satisfaction with the results — thank you! We feel greatly encouraged in this work because our pitons, piton hammers, Royalight tent, and Royalight sleeping bag were selected as the best in the U. S. for display at the 1959 American National Exhibition in Moscow.

We are devoted to the continuing process of perfecting equipment and hope that you can see in this catalog some of the results of our ardent pursuit of what is ideally suitable equipment. Again we enlist your cooperation in testing and criticizing whatever we offer; for only in that way can the best of equipment be made available. Your letters are always welcome.

Every order receives our individual attention and automatically goes out to you on approval. We stand behind our merchandise and your complete satisfaction is guaranteed. You may return any item for exchange or credit if it has not been used. All returns should be made within 10 days. We will be happy to send samples of fabrics on request. Although we do our best to maintain the prices shown in this catalog, we sometimes are forced to change them while the catalog is still in effect.

If you don't find what you want in this catalog, write to us about your problem and we will try to suggest a solution. Do stop to see us in Boulder.

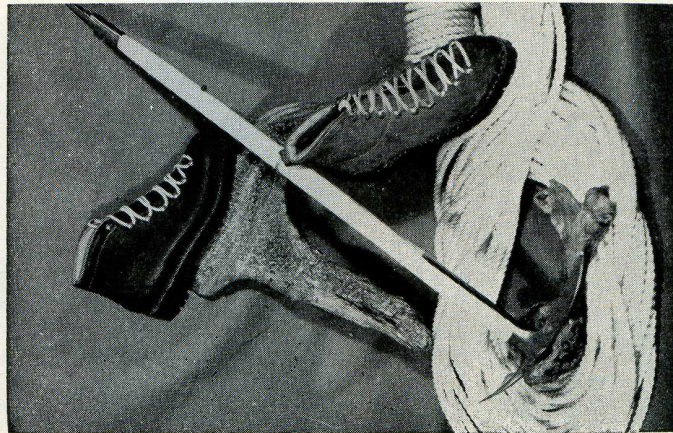

Roy & Alice Holubar

SHIPPING INSTRUCTIONS

To estimate cost of shipping your order add about one pound to the exact weight which is given with the description. Then consult the chart below. Molitor boots and books are shipped prepaid. For orders sent within Colorado add 2% sales tax. Send money order or check (cash by registered mail only). If you plan to send a money order, we suggest a bank money order as cheaper than a postal money order. Any excess payment will be refunded. Ordinarily your order is shipped on the same day it is received unless it includes made-to-measure items. If your order cannot be sent promptly, we will let you know. Our phone number is **Hillicrest 2-7656** if you wish to call us for super-quick service.

AUSTRIAN HANDCRAFTED KRONHOFER MOUNTAINEERING BOOTS. Mountaineers and outdoorsmen everywhere have endorsed these superb mountain boots as fulfilling the exacting summer & winter requirements that only truly fine boots can meet. They are made by Matthias Kronhofer to our own specifications on the best American lasts we have seen. Made of selected top-grain combination-tanned cowhide, rough side out, and fully lined with smooth calfskin. Seamless construction except for leather inset on inside of ankle to achieve a perfect ankle fit. Top rim is lightly padded with pull-on loop in back. Sturdy scree caps protect heel counters that never lose shape. Triple hand-sewed storm welt. Boxed toes are moderately tapered. Sturdy leather sole, contoured under the foot, and Dufour rubber cleated soles & heels are about the same width as the foot to insure secure footing for rock climbing. Fatigue is cut greatly by the splendid fit provided by the excellent lasts. Finest hand-work insures the performance demanded by the most critical of climbers. Stock sizes 5 to 12½. Av. Wt. 5 lbs. **\$32.50**

SWISS HANDCRAFTED MOLITOR CLIMBING BOOTS

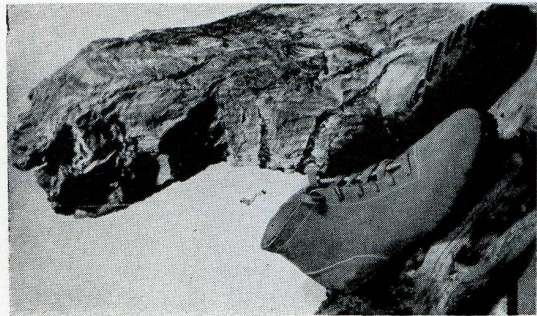

MOLI-207 MODEL

(lower boot pictured) has proved to meet the exacting requirements of guides and experienced climbers who must have a medium-heavy boot which will stand up under continuous hard use. The upper is made of a single piece of highest quality combination-tanned leather, fully lined with smooth, supple calfskin. Slight padding at the ankle and cushioned top rim assure comfort. Lacing is to the hard-cap toe. Leather scree caps protect the heel. Sturdy leather sole and Dufour sole are of the same width as the upper boot. This is a superb boot on difficult rock. Average weight about 5 lbs. In stock. Shipped prepaid. **\$50.00**

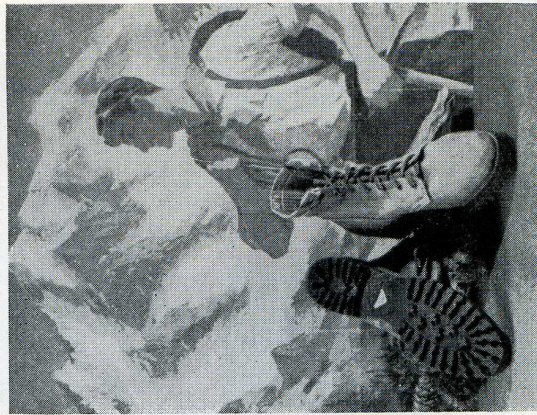

MOLI-210 MODEL (upper boot pictured) is similar to the Moli-207 boot but lighter in weight and more flexible because both the leather and Dufour soles are thinner, the upper leather is lighter, without ankle padding. Black pebble-grain finish leather. Average weight about 4½ lbs. In stock. Sent prepaid. **\$46.50**

TO ORDER BOOTS FROM STOCK: Please send your street shoe or boot size and the outline of both feet with all socks on and the weight evenly placed of both feet. Draw the outlines with the pencil held vertically to the paper. Fit is guaranteed. If by chance the first pair should not fit, send it back at once with a note explaining what is wrong. Another pair will be sent promptly.

TO ORDER MADE-TO-MEASURE: Molitor and Kronhofer boots are also available made-to-measure. If you have a fitting problem, this may be the answer. Delivery takes about eight weeks. Send for further details and measuring chart. Unless special lasts have to be made, the cost of made-to-measure boots is an additional \$3.50. Fit is at customer's own risk.

KRONHOFER KLETTERSCHUHE (on left). These are true Kletterschuhe and in our opinion the best we have seen. They are specifically designed for rock climbing so that their glove-like fit makes them almost a part of your foot. Unlined uppers of grey suede leather. Sturdy heel counters. One-piece Marwa lug sole and leather inner sole are contoured to the bottom of the foot. Lug soles designed for friction, with enough stiffness to give support on small foot-holds. Soles are sewed to uppers for durability. They will take the shape of the foot so should be chosen to fit snugly. Many customers say this popular shoe is so comfortable they wear it much of the time. Weight 2½ lbs. **\$14.00**

MOUNTAINERING BOOTS FOR WOMEN AND CHILDREN (on right) were made of top-grain leather for Women's Army Nurses Corps, and cost the government over \$11.00. These exceedingly comfortable boots are an excellent value. The last also fits boys and girls. They are fine hiking boots with the original Goodyear-welted leather soles and outer rubber-composition soles. Dufour lug soles and the small sole projection make them excellent climbing boots. Height optional, 6" or 10". Women's sizes 6½ to 8½. Specify widths. See page 3. Wt. 3 lbs. **\$6.50**

With Dufour soles and heels. Wt. 3½ lbs. **\$14.75**

DUFOUR RUBBER-CLEATED SOLES AND HEELS (shown on women's boots) are designed and made in Switzerland for general all-around climbing. The highest quality materials in Dufour soles give at least three times as much wear as the best domestic-made rubber soles. They are the choice of climbers over the world for their medium degree of hardness and finest pattern of cleats. This combination permits best friction-holding power and greatest security in standing solidly on ledges. Dufour soles can be put on any shoe or boot with a good leather welt. Allow one week. Price is for boots not needing additional repairs. Please note the cost of sending boots to us and add this amount for the return of your boots. Please take your laces out before sending. Installed **\$8.60**

Dufour Soles and Heels, Not Installed. Send boot outline. Wt. 1¾ lbs. **\$3.75**

Rubber midsoles used in resole jobs. Wt. ¾ lb. **\$.55**

ECKEL BOOT TREES (at right). Precisely adjustable to any size from 5 to 13. Separate steel clamps to hold the soles flat with adjustable tension. Insides of boots are unobstructed to dry. Leather straps with buckle allow fastening together to hang up. Wt. 28 oz. **\$3.50**

NORWEGIAN RAG SOCKS of thick springy wool for great comfort and long wear. About 9" high. Sizes 9 through 12. Gray. Wt. about 5½ oz. **\$1.95**

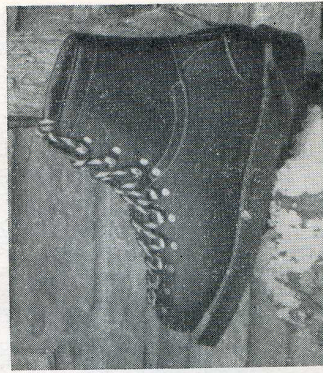

NORWEGIAN SELBU HAND-KNIT KNICKER STOCKINGS. Beautiful designs in black and white and brown and white. Knee-length. Beautifully knit of finest wool. **\$9.00**

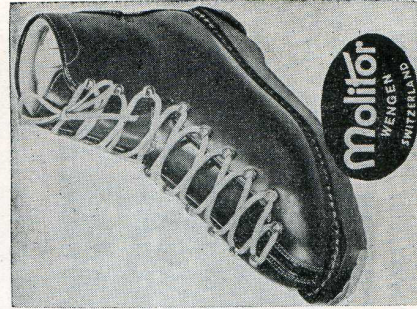

BONE DRY BOOTS provide excellent comfort and good quality at a new, low price. Machine-made of durable top-grain oil-tanned leather. They are built on a controlled combination last which insures a good heel fit and comfortable arch support. Excellent Dufour lug sole, hard toe, and heavy leather scree cap provide the foot with ample protection and guarantee that the boot will keep its shape during much hard wear. All leather joining seams double or triple stitched for great durability. A good value boot which will give many comfortable miles on the trail or on the rocks. Sizes 6 to 11½. Wt. 4 lbs. **\$19.75**

BERGMAN SEAL-SHINE LEATHER WATERPROOFING is a new and entirely different formula that waterproofs without softening the leather or causing it to stretch. Stainless, odorless, greaseless. Penetrates the leather and polishes to a high, long-lasting luster. Recommended specifically for ski and climbing boots, but excellent for dress shoes, handbags, and all smooth leather. Rough leather should be treated first with Dux-Bak. Wt. 3¾ oz. **\$.75**

DUX-BAK. An excellent liquid silicon waterproofing with resins especially recommended for leathers having the rough side out. Wt. 8½ oz. **\$.50**

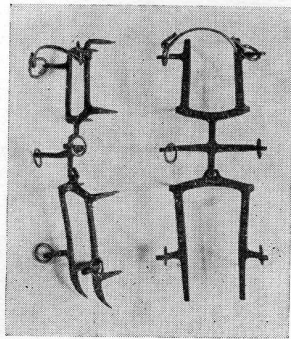

KRONHOFER SKI BOOTS. One of Austria's finest handcrafted ski boots. It is a double boot built over American lasts with an inner boot of unique and superior patented design: The inner boot is made in three separate sections: the middle section is built into the boot through lengthwise slits near the center of the insole, in order to draw up under and around the instep snugly. This **permits individual instep and ankle fit.** The ankle section is padded. Center and heel sections are so designed that the heel is anchored down in firm comfort. The outside boot heel is hinged by means of a special design which lets the upper boot bend forward when the ankles are bent, encouraging forward lean with its secure hold that is **entirely free from pressure against the shin bone.** The outer boot is made of carefully selected and properly tanned leather with sturdy outside leather heel reinforcements. A superb boot. Sizes in stock from 5 to 12½. Also available made-to-measure. (see Page 3). Shipped prepaid. **\$60.00**

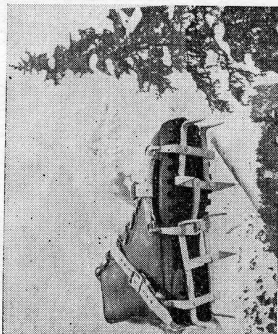

SWISS MOLITOR-128 SKI BOOTS. Molitor boots are recognized over the world as the finest of the boots that are handcrafted in Switzerland. Moli-128 boots are made on American lasts, contoured to the foot with narrow, properly fitted heels. This is a complete double boot with the inner boot of soft leather padded around the ankle and in the tongue. The outer boot is of medium-heavy leather, heavy enough to give maximum support. The heel is hinged to allow ankle bend. Moli-128 boots are built for years of skiing. Sizes in stock, 6 to 12. Also available made-to-measure (see Page 2). **SHIPPED PREPAID \$64.00**

MOLI-108 MODEL SKI MOUNTAINERING BOOTS. Designed especially for combined skiing and mountaineering. Made-to-measure only. \$53.50 plus \$3.50 for made-to-measure cost. Average weight, 5½ lbs. Sent prepaid **\$57.00**

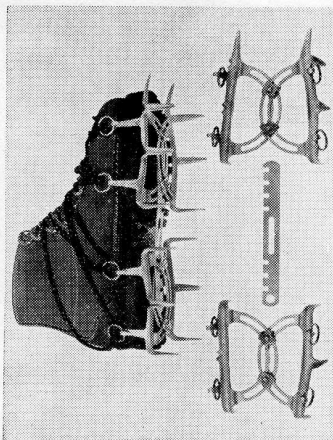

In the Stubai Valley of Tirol, Austria, a high degree of skill in forging dates back generations. Our equipment makers in this valley are climbers, who have developed the tools and techniques for climbing the peaks and glaciers surrounding Fulpmes. Wastl Mariner conducts his world-famous rescue school here, and it is the training area for guides, as well as the testing ground for much of the equipment we offer.

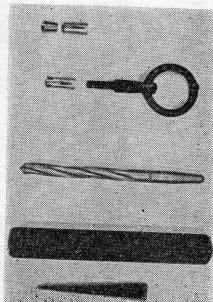

FULPMES ECKENSTEIN 12-POINT CRAMPONS. Recommended for heavy duty and extensive wear on hard ice. The two front points are demanded by most climbers for steep slopes and faces to eliminate step cutting. These points can be cut off if desired. Length of points, 1 5/8". When ordering, send bootsole outline. Harness not included. Wt. 2 3/4 lbs. **\$12.75**

U.S. ARMY MOUNTAIN TROOPS' CRAMPONS of sturdy riveted frame with two-buckle harness, recommended for snow slopes but not for extensive use on hard ice. Small and large sizes. Wt. 3 1/4 lbs. **\$3.75**

AVCIN ADJUSTABLE UNIVERSAL CRAMPONS endorsed by Lambert, Rebitch, Buhl, Cassin. Wt. 25 oz. Made of tough, especially hardened steel, these crampons differ remarkably and radically. They are precisely adjustable to any length or width. Right and left are identical. Crampons can be halved at will to make separate 6-point crampons or ski climbers. They have been thoroughly tested and used. The new model is improved with heavier adjusting bolts and a hinged center bar, which is not as pictured here. **AVCIN CRAMPONS** with hooks, special rubber lacing harness, wt. 25 oz. **\$15.50**

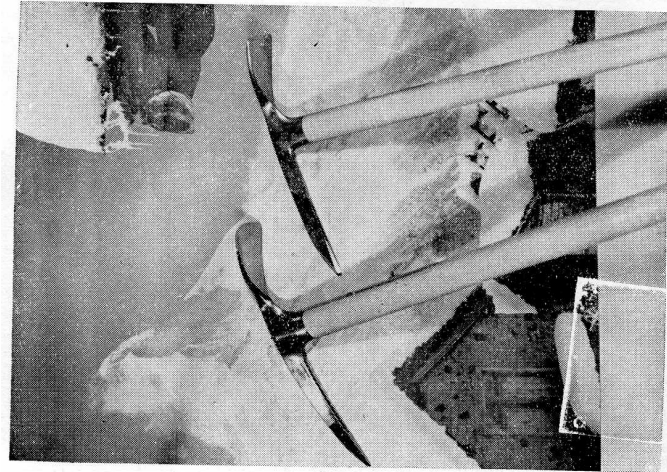

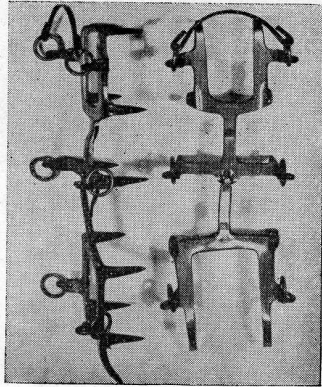

BOLT, re-usable, wt. 1 1/2 oz. **\$.75**
ANCHOR, not retrievable. Wt. 1/4 oz. **.16**
ROCK DRILL, 3/8", about 1 3/4 oz. **.120**
HANGER for drive studs, reusable. Wt. about 1 3/4 oz. **.40**
1 1/2" DRIVE STUD for hard rock. Wt. about 1/2 oz. **.14**
2" DRIVE STUD for soft rock. Wt. 1/2 oz. **.14**
ROCK DRILL, 1/4" for drive studs. Hole must be 1" deep. Wt. 1 1/4 oz. **1.10**
HOLDER for either 3/8" or 1/4" drill. Specify. Cut off to lighten. 11 oz. and 9 oz. **2.50**

FULPMES LIGHTWEIGHT CRAMPONS. Exceedingly strong and durable because of the special steel. Slender construction throughout. Length of points, 1 3/8". Web straps with buckle included. Wt. 1 1/2 lbs. Send bootsole outline. **\$12.75**

CRAMPON HARNESS. Leather strap harness with buckle fastening. Wt. 5 oz. **\$2.50**

CRAMPON HARNESS. Leather throng harness with secure-grip, quick-release clamp. Wt. 3 oz. **\$3.50**

STUBAI ICE AXE (left one in picture) is an improved model of the famous Aschenbrenner axe made by the same maker. Considering design, quality, and craftsmanship, no finer axe than the Stubai Model is being made today. It is a product showing the devotion and pride of true craftsmen in striving for perfection. The steel in both the head and point is tough and flawless. The adze is spoon-shaped with rounded corners and sharp cutting edge—superior features for most efficient cutting. The pick, too, is of the proper knife-edged design. The highly polished and smooth head is so shaped as to make it a real joy to grip. Spike and ferrule are separate pieces. Length of the head is about 11 3/4 inches. Axes are available in even lengths from 32 to 40 inches. Please specify definite length wanted or measurement from the middle of the palm to the floor, when standing at ease with arms hanging down. Wt. about 2 1/2 lbs. Includes glide ring and sling. **\$11.50**

ASCHENBRENNER ICE AXE, on the right. This is an excellent model for climbers wishing an axe of lighter weight, that is sturdy, strong, nice to handle and easy to pack. Head is about 10 3/4 inches long. Even lengths from 32 to 40 inches are available. With glide ring and sling. Wt. 2 lbs. **\$10.50**

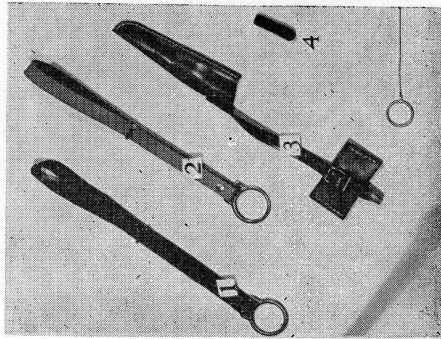

ICE AXE HEAD GUARD of leather. State width of adze. No. 3. Wt. 2 1/2 oz. **\$1.75**

ICE AXE POINT GUARD of rubber tubing with rivet stop. No. 4. Wt. 2 1/2 oz. **\$.25**

GLIDE RING AND SLING STRAP. A smooth steel ring with a 1 7/16" round hole so that shaft can turn.

With web strap, No. 1, Wt. 1 1/4 oz. **\$1.00**

With leather strap, No. 2, Wt. 2 oz. **\$1.50**

HOLUBAR EXPEDITION OVERBOOTS. Custom-built only. At the request of climbers going on expeditions we have been making this high overboot for cold trips. One well-known climber after using his overboots in three expeditions has written, "... they are still the finest boot covering in the world for long snow climbs." They are the best light-weight protection against cold and frostbite. These overboots insulate the climbing boots and keep them dry but allow the feet to breathe. They are made of tough, water-repellent nylon duck and have full cow-hide bottom edges and soles to assure wear and protect against the crampons. Specially designed closing allows quick and easy on and off by merely fastening or releasing at the top. Send boot sole outline and state desired height. Weight of 20" high overboots, about 15 oz. **\$15.50**

NEW COLUMBIAN NYLON MOUNTAIN CLIMBING ROPE

There is no finer nor stronger rope than the new, improved nylon rope made on special order for us by the Columbian Rope Company. This rope is made with a special lay best suited for mountain climbing. While soft enough to insure ease in handling, Columbian's special patented stabilizing process makes it very abrasion resistant under strain, without reducing its elastic qualities. This is the only rope made without any knots in the yarn. Since every fiber is continuous for the full length of the rope, the minimum breaking strength is high. In the table below the minimum strength is about 90% of the average tested.

Four sizes of nylon rope are commonly used by climbers. All four sizes are used for rappelling. The 7/16" is considered standard for all-around use because of its thickness, strength, and long-wearing qualities. The 3/8" is very popular because of its lighter weight, less bulk, and lower cost. Both the 1/4" and the 5/16" are used for long rappels, fixed ropes, and slings. The 5/16" is popular for rappel sling seats. Ten feet are usually enough for the average revised Swiss or Army seat. For prusik slings and the like, the 1/4" is recommended.

Size	Average Breaking Strength	Approx. Weight	Price
7/16" x 120'	5500 lbs	6 1/4 pounds	\$23.00
3/8" x 120'	4000	4 1/2 pounds	18.50
5/16", any length	3000	2.6 lbs./100 ft.	11c/ft.
1/4", any length	1800	1.6 lbs./100 ft.	8c/ft.
7/16", any length	5500	5.1 lbs./100 ft.	20c/ft.
3/8", any length	4000	3.6 lbs./100 ft.	16c/ft.

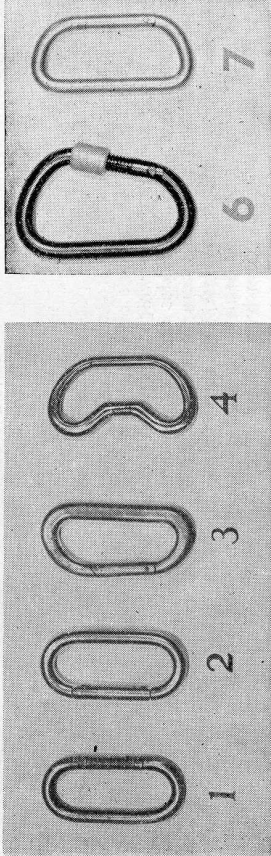

NYLON BRAIDED CORD, about 3/16" diameter. Light-weight braided cord with inner cords forming a core. Useful for many purposes including slings and rappel pull-down cords. 550 lbs. strength. Wt. per 100 ft., 7 oz. Any length, per foot \$.02

Same cord dyed red. Any length, per foot \$.04

NYLON SOFT BRAIDED CORD for laces, guy lines, and many uses. Diameter about 1/8". Strength about 250 lbs. Weight per 100 feet, 4 oz. Any length, per foot \$.02

NYLON WEB STRAP, 1 3/4" wide. Two weights, 3000 lb. or 6000 lb. Specify, per foot \$.15

Nylon web strap, 1" wide, double, strength about 4500 lbs., per ft. \$.15

AUSTRIAN STEEL KARABINER, No. 1. Well-made with close-fitting notched gate. Test about 2800 lbs. Wt. 4 1/2 oz. \$1.15

BEDAYN DURALUMINUM KARABINER, No. 2. Choice of the majority of experienced climbers. Strongest of the aluminum alloys, smoothly polished with rounded edges. Notched gate. Test 2800 lbs. Wt. 2 oz. \$2.35

FRENCH DURALUMINUM KARABINER, No. 3. Designed so that most of the load is carried by the solid heavy side. Gate can be opened under load, desirable in tension climbing. Test 2300 lbs. Wt. 2 1/4 oz. \$1.90

MARWA KARABINER, No. 4. Designed by the famous rescue authority, Wasil Mariner. This is the strongest karabiner made because of its unique shape, which takes the load completely away from the gate side. Gate opens freely under load, desirable in tension climbing. Tests about 4000 lbs. Wt. 4 1/2 oz. \$2.50

MARWA KARABINER, No. 5, not pictured, is the same as number 4 but has a safety sleeve on the gate. Wt. 4 3/4 oz. \$3.00

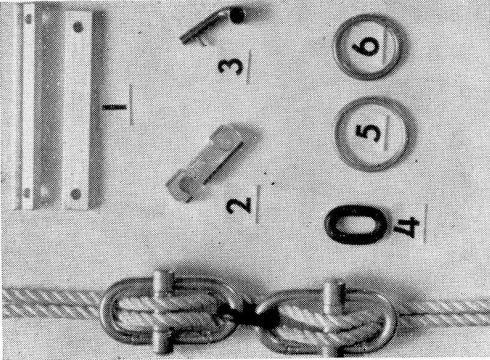

NEW MODEL "D", No. 6. Has safety gate, tests above 3200 lbs. Wt. 7 oz. \$2.50

NEW MODEL "D" AUSTRIAN STEEL, No. 7. Design has greater strength than oval, testing more than 3000 lbs. Wt. 4 1/2 oz. \$1.40

HOLUBAR

1215 Grandview Avenue

BOULDER, COLORADO

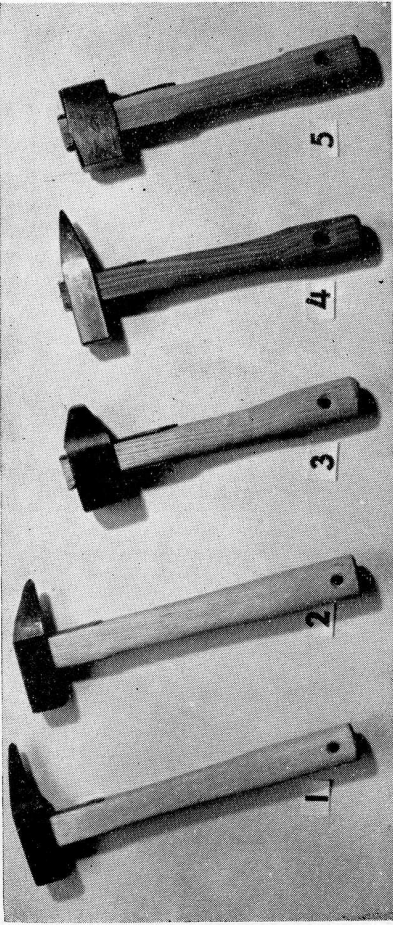

EUROPEAN STYLE ALUMINUM STIRRUPS (no. 1) for use with 1/4" or 5/16" rope. Sturdy U-shaped channel 3/32" thick; will not deform under heavy body weight. 1" wide and 5 1/2" between holes. Specify rope size. Wt. 1 1/4 oz. \$.45

HOLUBAR DURAL BRAKE BAR (no. 2 and pictured with rope). Designed by Rangers Susong and Frawson for use with the Bedayn Karabiner. Use singly or in pairs for rappelling and for rescue. Not harmful to rope since wide bearing surface assures smooth resistance without sharply bending the rope. Wt. 1 1/4 oz. To fit Bedayn \$1.00 To fit Austrian Steel Karabiner No. 1 \$1.00

AUSTRIAN STEEL BRAKE BAR (no. 3) Discontinued in favor of dural bar with wider bearing surface.

CHAIN LINK (no. 4 and pictured with rope) for connecting two karabiners in tandem. Test 1700 lb. Wt. 1 1/4 oz. \$.40

DESCENDING RINGS (nos. 5 & 6). Used as anchor for rappel rope or 2 rings are used with pull-down cord when rope is used single to rappel. 2 1/4" diameter \$.18 2" diameter \$.16

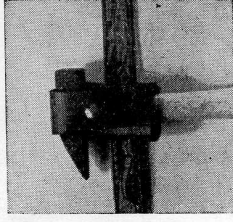

HOLUBAR PITON HAMMERS (selected for American National Exhibition in Moscow) are without question the finest available. The head is hand-forged and carefully shaped to perfection of Crescent Special Tool Steel, and is securely locked onto a selected hickory handle without the use of any wedge in such a way that it cannot come off. This perfectly balanced hammer is a treasured tool of hundreds of climbers who report it out-wears other hammers many times. A rugged, dependable, and beautiful hammer you will be proud to own. Specify model number. Nos. 1 and 2. Wt. 1 pound \$4.25 Same design, but heavier. About 1 1/4 lb. Nos. 1H and 2H \$5.00

IMPORTED HAMMERS, No. 3 is an Austrian heavy hammer with a fine chisel edge on one end. Especially suitable for drilling expansion-bolt holes. Wt. 20 oz. \$4.00

No. 4 is an Austrian-made hammer of standard design. Wt. 14 oz. \$2.75

No. 5 is an Austrian-made heavy block hammer. Wt. 1 lb. 5 oz. \$4.00

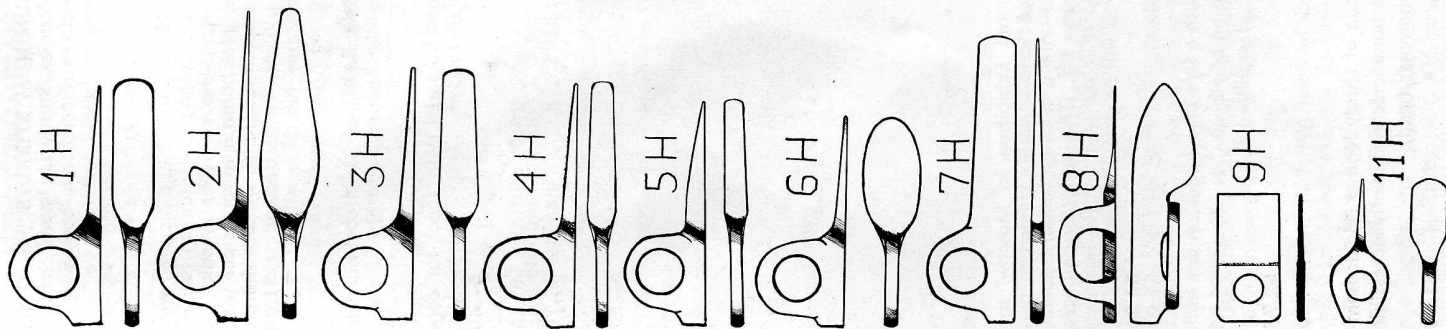

HOLUBAR HAMMER HOLSTER. Made of sturdy leather. Holds hammer securely to trouser belt. Makes hammer conveniently accessible for use. Measure circumference of hammer head. Wt. 1 1/2 oz. \$1.40

HOLUBAR

1215 Grandview Avenue

BOULDER, COLORADO

HOLUBAR HAND-FORGED PITONS. Chosen for the American National Exhibit in Moscow. Tests made over a period of years, not only in the laboratory but in actual use in many different localities, have proved that there is no finer rock piton than our own. We take great pride in offering our superb pitons. Each one is hand-forged with great care and skill by our master craftsman here in the mountains.

To insure maximum strength, toughness, and holding power we have taken special care with design, hardness, and uniform quality control. Forming the eye by punching while forging bends the metal fibers around the hole without damaging them to give maximum strength. Drilling cuts the metal fibers and gives a weaker eye. Random stock samples tested in the laboratory in granite showed bending strengths ranging from 3200 lb. to 7700 lb. with the piton generally pulling out without failure of the piton itself. Being hand-forged, they vary slightly from one to another, thus allowing a much better selection than machine-made pitons.

Specify both model number and length of blade if there is more than a single blade length. Av. wt. 3 oz. \$.55

HORIZONTAL: 1H blade lengths, 4 1/2", 2 1/2", 1 3/4", 2H blade length, 3 1/4" only
3H, 4H, 5H and 6H blade length 2 1/2" only.
VERTICAL: 7H blade lengths 4 1/2", 3 1/2" and 2 1/2".

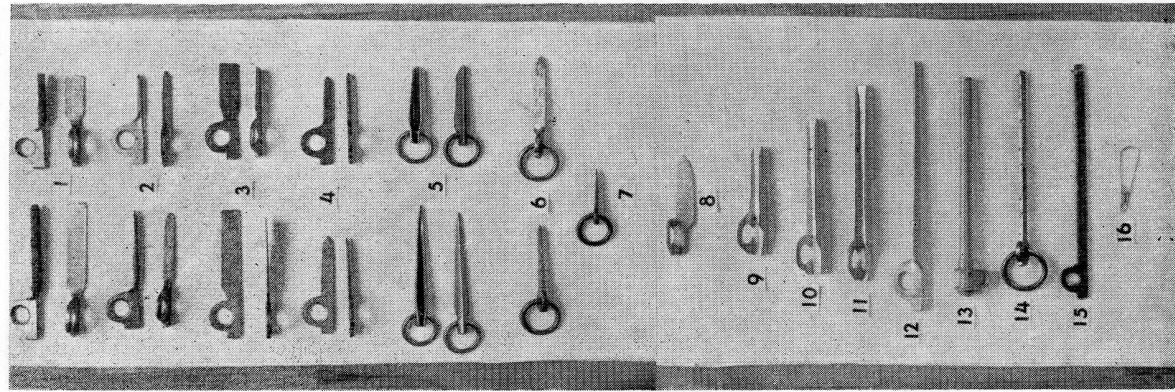

COMBINATION HORIZONTAL & VERTICAL 8H. A modification of the French Simon with improvements to reduce twisting torque when used as a horizontal. Blade lengths 2" & 3". **\$.55**

KNIFE BLADE PITONS 9H and 10H. Superb pitons to meet the most critical demands made of knife blades. Utmost quality control for strength and holding power in rock. Eye is hardened and will not deform while ductility of blade is maintained. Can be used over and over again. Thickness at root about 0.085", at tip about 0.055". Wt. 1 1/4 oz.

9H, two blade widths: 1 1/16" or 7/8" by 2 1/4" long. Specify width. **\$.75**

10H, not pictured, like 9H but with ring about 3/4" wide by 2 1/4" long. **\$.90**

No. 11H. Versatile wafer. Very effective new design. Blade about 3/4" wide with length from 1 1/4" to 1 1/2" long. Eye is skillfully hardened to prevent deformation while ductility of blade is maintained. Snug fit of eye with flanges resting against lips of cracks provides unusually good holding power. Wt. 1 1/4 oz. **\$.55**

Various localities with different kinds of rock require pitons of different designs. We offer a wide selection to suit the particular locality where you climb.

AUSTRIAN ROCK PITONS, Nos. 1, 2, 3, & 4. Blades vary in width, thickness and length. Long blades pictured on left are up to 5"; on right about 2 1/2". Thin blades, nos. 1 & 2, are especially adapted for stratified rock where minimum dislodging action is desirable. Specify model number and long or short blade. Wt. about 3 oz. **\$.30**

ANGLE PITON, No. 5 with 1 1/4" ring. The holding power of a true angle piton (V-shaped cross section, not oval) is the greatest of all pitons. Under actual climbing conditions it is the most versatile especially for cracks of varying size where the compression of its angles gives a uniform grip along the sides of a crack. The ring allows greater freedom of movement than a fixed eye. Specify regular 6 1/2" or stubby 3 1/4" length. Wt. about 4 oz. & 3 oz. **\$.60**

AUSTRIAN RING PITONS, No. 6. For horizontal or vertical cracks. Especially suitable for rappelling. Blade 3" to 4 1/2". Wt. 4 oz. **\$.60**

SMALL WAFER, No. 7. With ring similar to U.S. Mountain Troopers'. Blade about 2". Wt. 3 oz. **\$.50**

FRENCH ROCK PITON, No. 8. Elongated eye allows two karabiners for tension climbing. Hard cadmium plated steel can be used in both horizontal and vertical cracks. Specify 1 3/4" or 2 1/2" blade. Wt. 3 oz. **\$.45**

FRENCH ANGLE PITON, No. 9. Has U-shaped cross-section 5/8" x 1/4" and oval eye large enough for two karabiners. Length 5 1/2". Wt. 3 oz. **\$.90**

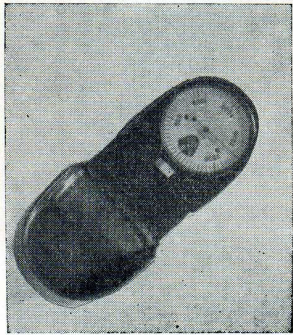

FRENCH ICE PITONS, Nos. 10 & 11. Same design as No. 9. Cross section 3/4" x 1/2", 6" or 8" blade. Specify. Wt. 4 1/2 oz. & 5 1/2 oz. **\$ 1.50**

FRENCH ICE PITON, No. 12. Smooth cadmium-plated steel 5/32" x 7/8" tapering to 3/8", 12" long with oval fixed eye. Wt. 7 oz. **\$ 1.50**

TUBULAR ICE PITON, No. 13. U.S. Mountain Troopers'. Cadmium-plated with revolving eye. 9" blade. Wt. 6 1/2 oz. **\$.70**

AUSTRIAN ICE PITONS, Nos. 14 & 15. Notched blades about 9" long. Specify ring or fixed eye. Wt. 7 oz. **\$ 1.10**

PITON KEEPER, No. 16. Safety snap to prevent loss of piton when driving. **\$.10**

SWISS THOMMENS POCKET ALTIMETER. (Pictured with case open.) This, we believe, is the ultimate in a precise compensated altimeter weighing only 2 1/4 ounces with its case. This beautiful instrument gives accurate and quickly legible altitude measurements, and it permits weather prediction with its indications of changes in barometric pressure. Has jeweled bearings in watch movement. Two dials read from sea level to 15,000. One has 1000-foot intervals; the other, 50-foot intervals. Case size is 2" x 2 1/8" x 3/4". **\$25.50**

COMPASS No. 2. A wrist compass made by Waltham Watch Co. A nice, carefully made, luminous-dial compass with a fine, removable wrist strap. Diameter of compass is 1 1/8" and thickness is 7/16". Wt. 3/4 oz. **\$1.50**

SILVA COMPASS, No. 3 has calibrated revolving dial for route finding. A "compass hike" is easy and fun. Wt. 1/2 oz. **\$2.50**

TAYLOR POCKET THERMOMETER, No. 1. An accurate thermometer in a nickel-plated brass case with pocket clip. 6" long. Very legible from -50° to 125° F. Wt. 1 oz. **\$3.00**

ATTENHOFFER GOGGLES, No. 4. Very light aluminum frame with smoke glass lenses. Designed to minimize fogging. This style of goggles was worn on Everest. Adjustable headband. Wt. 1 oz. **\$1.40**

Smoked Glass Lens \$1.40
Smoked Plastic Lens \$.90
Extra Lens pr. \$.40

A & T PLASTIC LIGHTWEIGHT GOGGLES, No. 5. With three interchangeable plastic lenses: clear, amber, and smoke. Frame is tough polyethylene. Fogging is minimized by proper ventilation. Wt. 3/4 oz. **\$2.00**
With smoke lens only **\$1.00**

FEATHERWEIGHT GOGGLES (not pictured). Fold very compactly. Plastic smoke lenses. Adjustable elastic head-band. Wt. 3/4 oz. **\$.35**

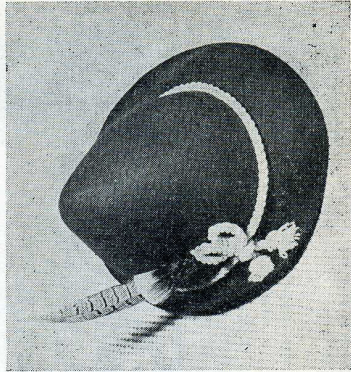

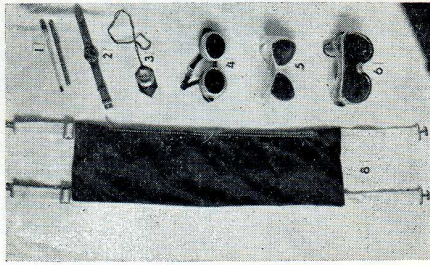

NORTHLAND GOGGLES, No. 6. Fit with perfect comfort over most glasses but excellent by themselves. Three interchangeable lenses—clear, amber, green—in clear ventilated polyethylene frame. Adjustable headband. Wt. 3/4 oz. **\$2.00**

FIRST-AID BELT, No. 8. keeps first-aid equipment, cameras, other small items handy while hiking and climbing. Tough zelan treated nylon duck. 1" adjustable nylon web straps with quick release fasteners. 22" long, 6" wide. 10 various-sized loops inside for holding contents firmly in place. 15" zipper opening. Wt. 5 1/2 oz. **\$4.50**

TANASOL GLACIER CREAM. A greaseless, odorless cream that does not show on the skin. The best cream that we know about for preventing sunburn. One application lasts some six hours. Promotes an even tan and relieves sunburn in case it was not applied in time. Good on lips and around eyes. A great help for the most delicate skin. In jar. Wt. 7 oz. **\$.55**

MOUNTAINEER'S HAT. An authentic Tyrolean hat made of durable, weather-proof Alpine green fur felt. Comfortable and very practical. Narrow brim permits wearing even when climbing. Concealed ear flaps for warmth. Elastic chin cord. Gay feather. Sizes 6 3/4 to 7 1/2. Wt. 4 oz. **\$7.80**

IMPORTED TYROLEAN CHAMOIS OR ELK BRUSH with silver holder. **\$4.00**

HOLUBAR

1215 Grandview Avenue

BOULDER, COLORADO

HOLUBAR PARKA. Widely acclaimed as incomparably superior to any other mountain parka. It distinguishes itself with the following superb features:

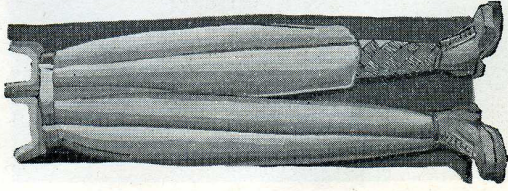

—**Handsome Styling**—cut for easy fit with good-looking lines. Meticulous sewing with care for every detail. All three pockets are bound and fitted with covered zippers. **Womans parka has sleek front pockets below waist line and no waist cord in front.**

—**Complete Weather Protection**—double construction to waist of wind-tight, water-repellent nylon cotton, with unsurpassed comfort of cotton and strength of nylon. Adjustable drawstring at waist. Full torso length. Great versatility, adjusts to changing conditions of weather with full length zipper front closing insulated by double-fabric under- and over-zipper flaps, which can be completely opened or closed and controlled with complete secondary snap closing. High-Low hood covers as much or as little of head and face as desired without obscuring vision. Adjustable wrists with elastic and snaps permit loose or tight fit. Excellent for both skiing and climbing, and also town and country wear.

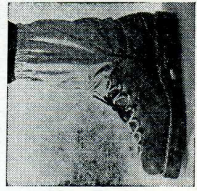

—**Convenience and Comfort**—Cut for freedom of action. Sleeves are set so parka will not ride up when arms are raised. Pockets at handy reach for hands and for carrying. Back pocket gives access to completely back space between fabric layers. No shoulder seams to rub under pack straps.

—**Serviceability**—the Holubar Parka lasts through years of hard wear. Fabric and construction are extremely durable. All eyelets and snaps reinforced, all seams and facings finished. Available in red or light gray. Styled for men or women. Sizes S, M, L, XL. To help us select best fit for you, men state neck and sleeve size, chest measurement, and length in back from collar to belt; women state dress and hip size and arm length from shoulder seam to wrist. Wt. 19 oz. **\$22.00**

LEATHER RAPPEL PATCH to be sewed on parka. Specify right or left shoulder. Wt. 20 oz. **\$1.50**
Sewed on. **\$2.00**

HOLUBAR CLIMBING PANTS for men and women tailored to perfection of tough, handsome gabardine blend fabric which is more snag-proof and abrasion resistant than any one-fibre whip-cord. It is light-weight, comfortable, and keeps its shape. This outstanding fabric stays dry exceptionally well and dries quickly. Made with two front pockets with zipper closing. Two hip pockets with button flaps. Zipper fly. Wide back belt loop. Double seat and knees. All pants custom-made to your measurements. Give waist, hip, inseam, and length along outside of leg from top of belt to ankle. Pants tailored for women without hip pockets unless specified and with side zipper instead of fly. Tan. Leg style can be worn down or knickered. Also available in knicker only. State desired style. State girth of leg at knicker band and desired length for knickers. Wt. 23 oz. **\$25.00**

HOLUBAR SNOW AND SCREE GAITERS. Small light and very effective in keeping snow out of the boot tops of both climbers and skiers. Made of extremely tough water-repellent nylon duck. Elastic top and bottom. Leather-reinforced eyelets for lacing under instep of boot. Wt. 3 oz. **\$3.00**

HOLUBAR DOWN-FILLED HOOD to match LEKKAY or HOLUBAR PARKA. Entirely without cold seams. Even snaps are insulated. Cover face if desired and widely overlaps collar. Adjusts with friction slides that need no tying. Wt. 4 oz. Red or blue. State color. **\$8.50**

NEW TERRAY DOWN-FILLED PARKA designed for greatest warmth and freedom of motion with absolute least weight. Supplied to many expeditions. Serviceable and strong French nylon throughout. Roll collar. Knitted ribbed wool wrists. Full torso length with elastic at bottom hem. Actually two jackets with one lining the other, designed so that horizontal tubes overlap throughout. Filled with best goose down. No stitched-through seams. Double row snap fastening. Sleeves pull inside to make extra insulation under shoulders when used as upper part of sleeping bag with basic section of additional length bag for lower body. (see page 19). Rolls into carrying bag 6" x 11". French blue. Medium and large. Wt. 28 oz. **\$41.50**

HOLUBAR DOWN-FILLED PARKA made only on a custom basis. French nylon or 11-A nylon inside and outside with ultra-lightweight nylon baffle material. Horizontal overlapping tube construction throughout, filled with specified amount of finest goose down. Elastic at cuffs and bottom hem. Sleeves slightly extra long for use as hand warmers. Double row snap fastening down front. Roll collar. Torso length. Can be used as top of sleeping bag same as Terray. Red or blue. Rolls into bag 6" x 11". Basic price \$46.50 with pound of down, but this would vary with the number of extra features and changes you want. Write us your special needs and wishes. Wt. approx. 32 oz. **\$46.50**

HOLUBAR DOWN MITTS. Uniform down and polyurethane insulation. Elastic at generous cuffs. Measure around widest part of palm. Wt. about 7 oz. pair **\$16.50**

HOLUBAR DOWN-FILLED PANTS of nylon 11-A and down, same as Down Parka. Zipper fly. Horizontal baffle construction throughout with overlapping tubes. Separating insulated zippers along full length of outsides of both legs permit pants to be put on over boots and crampons. Custom only. State size of waist and inseam. Blue and red. With 1 lb. of down, wt. 34 oz. **\$46.50**

LEATHER BUCKSKIN GLOVES are especially suited for climbing because they are soft, supple, and long-wearing. They dry soft after being wet. The leather used in these gloves is scarred and not suitable in appearance for dress gloves but excellent for outdoor wear. Blemishes do not impair wearing quality. Send correct size by measuring the open hand around the knuckle joints, not including the thumb. **\$3.10** Wt. 3 oz.

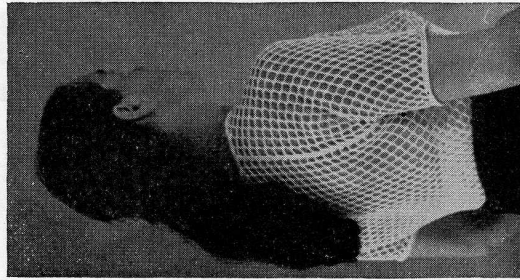

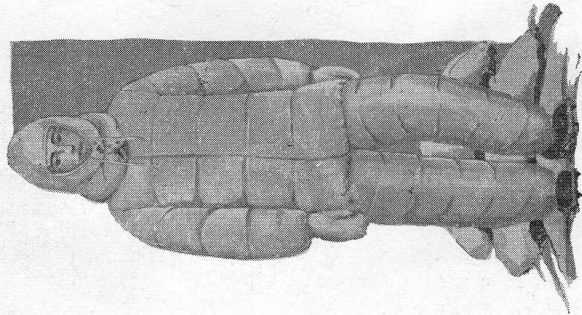

NORWEGIAN NET UNDERWEAR. Ancient seafaring Vikings discovered that wearing fish nets under other clothing increased their comfort tremendously against extremes of temperature, either cold or hot. Today open mesh underwear has become standard equipment with mountain climbing expeditions and was used on all of the recent Himalayan ventures. Our E.K.T. brand imported from Norway is the best quality that we have seen and is the brand adopted by the Norwegian Army. Its thick, soft, durable mesh is of ideal dimensions to provide air isolation next to the skin, trapping body warmth and slowing down heat loss by conduction. It gives a comfortable, dry feeling even when the body is perspiring freely, and it prevents the cold, chilled feeling from the mountain breeze. E.K.T. comes in T-shirts for men and women. Please state your chest measurement when ordering. **\$3.25**

NORWEGIAN NET PANTS, for men. Small, medium and large. **\$4.75**

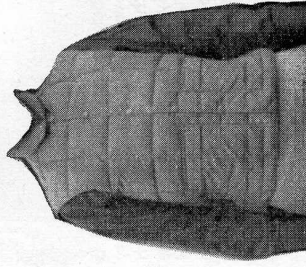

HOLUBAR

1215 Grandview Avenue

BOULDER, COLORADO

ROYALIGHT ACTION PARKA designed for cold-weather activities—skiing and all outdoor sports, this handsome diamond-quilted nylon parka filled with 8 oz. of goose down weights only 24 oz. Ample cut for freedom of action, it is warm and comfortable, completely windtight with tough, water-repellent 11-A nylon fabric. Exceedingly durable. The plain hood is attached. Full, covered zipper front closing. Double pockets, inner one down-filled for warmth and the outer securely snapped with separate compartment. Elastic at wrists. Washable. Blue lined with red. **Can be worn red side out.** Sizes for men and women: S, M, L. **\$38.50**

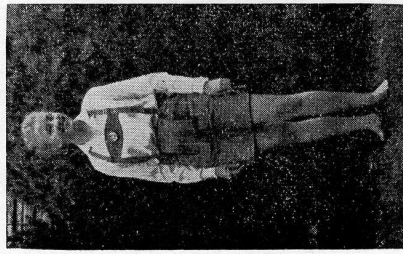

DOWN-FILLED QUILTED ACTION VEST worn in combination with our parka assures comfort over a wide variation in temperature. Down-tight nylon throughout. 6-snap front closing. Warm down-filled tube collar. 2 ample front pockets with tight self-closing storm flaps. Waist slightly fitted with elastic insets. Extends below waist for protection even when reaching. Rolls to 22" x 7", stuffs even smaller. Wt. 11 oz. **\$14.50**

LEDERHOSEN. Very finest in quality and workmanship in the traditional Bavarian style of rugged suede-finished cowhide or velvet soft deerskin. Two front and one back pocket with knife pocket on the side. Leather lace adjustment on sides of legs and in back of waist. Designed for men but also worn by women. Give waist measurement. **Cowhide, wt. about 2 lb. \$18.75, Buckskin, \$28.50**

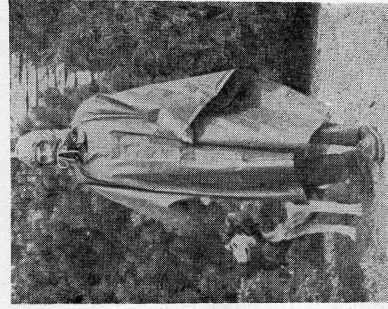

SUSPENDERS. Felt-lined leather with carved ornament centered on breast piece, which has a zippered pocket on the back. Give measurement from back of belt over shoulder to front of belt. With genuine hand-carved ornament. **\$4.90**

With simulated hand-carved ornament **\$3.75**

HOLUBAR NYLON PONCHO. The most versatile piece of lightweight equipment you can own: rain coat, pack protector, canopy, shelter, ground sheet. Superior detachable hood turns with head. Tailored hood adjusts under chin or over lower face with snaps and drawstring. Neck opening closes securely. Reinforced snaps along arm edge to keep out rain. Reinforced grommets at every corner. Light coated nylon, coated side out. Seams waterproofed. 66" x 90". Tan. Wt. 16 oz. **\$14.50**

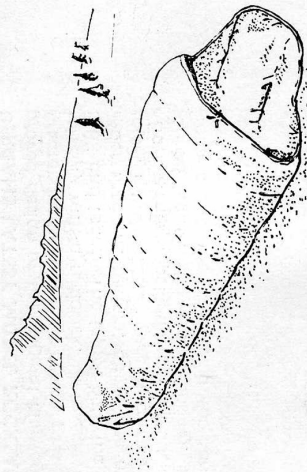

HOLUBAR NYLON RAIN CHAPS. Shaped separate trouser legs to wear over pants and tie to belt. Waterproof of same nylon fabric as ponchos. Excellent for wear in wet brush, on hikes as supplement to ponchos, for horse-back trips. Inseams measure 29" to 33". Specify length. 3 oz. **\$4.50**

HOLUBAR

1215 Grandview Avenue

BOULDER, COLORADO

ROYALIGHT SLEEPING BAG. Chosen for outstanding excellence to represent the U.S. at the American National Exhibit in Moscow. The finest bag available for maximum warmth with absolute minimum weight and packed size. Special nylon balloon cloth baffle construction forms cross-wise overlapping tubes of best dimensions for most efficient control of down. This eliminates shifting and all cold seams, even in the hood. A smooth uniform down thickness of about 3 inches minimum over the entire bag. Extra thick down insulation under shoulders, hips, and feet eliminates the need for materials which cannot be compressed for packing. This bag is made of the finest imported French water-repellent nylon. Girth throughout body of 62" tapering to 44" at ankle provides a bag which is contoured without being confining. The foot end is shaped for warmth and comfort. **The hood** is so contoured that it can be adjusted to suit all conditions. Warm to about 10°F. with 2 pounds of best quality goose down, to about -5°F. with 3 pounds of down. A full or half-length side zipper insulated with a down-filled tube and snap-proof flaps is optional; it adds 4 to 6 ounces of weight. Two bags can be made to zip together. Rolls or stuffs into its nylon case 8" x 16". Wt. less zipper is 3 pounds. Please give your height and weight and specify if zipper is wanted. If additional down is wanted add \$6.50 per 8 oz. No more than one pound extra is recommended. Price of a 3 lb. bag, **\$88.00**

ALPINE DELUXE. A moderately light-weight bag designed to take the average sleeper down to around 15°. Length-wise baffle-tube construction filled with 2 lbs. of 100% pure goose down. Outside and inside water-repellent fawn-colored 11-A nylon. Draw-string hood pulls up tight or lies flat. 34" zipper at center front. 9 combination snap-tie loops around hood for snap-in liner. 68" girth at top tapered to 56" girth at foot. Comes with carrying bag. Regular size for people 5'10" and under, 4 1/4 lbs. Large size for those over 5'10", 90" long. 4 1/2 lbs. **\$75.00**

TETON BAG. Designed for the backpacker and climber who wants minimum weight with enough down for about freezing. Tough, water-repellent nylon inside and out. Cross-wise wall-type box construction. Hood draws tight or lies flat. Filled with 1 1/2 lbs. of 100% goose down. 36" zipper front center with protector flap and down-filled insulating tube. 58" girth throughout body tapered to 40" girth at foot. Carrying bag. Blue color. Long enough for people up to 5'10" tall. Wt. 3 lbs. **\$45.50**
Large size for those over 6 feet. 4 ounces of extra down added Send height. Wt. 3 1/4 lb. **\$48.50**
Extra down can be added to either size bag. Add \$6.50 for each oz.

TETON BAG for two people. Same construction as single bag. Full length zipper down front center. 84" girth at top tapered to 61" girth at foot. 3 1/4 lbs. down. Wt. 5 1/4 lbs. **\$75.00**
All of the above bags are hand-washable in mild soap.

LULO AIR MATTRESS. This is the British mattress that proved excellent on Everest. Made of sturdy fabric with latex rubber coating. Has true box construction with four length-wise tubes. The outer tubes are slightly larger and cradle you giving great stability. A durable and comfortable mattress. Easy to inflate through all-rubber valve. Deflated size 29" x 54". Wt. 2 lbs. **\$8.95**

NEW, NYLON AIR MATTRESS. The lightest mattress we have yet seen. Weights only 24 oz. Made of tough rubberized nylon. Five lengthwise tubes. Tubes on outside edges are slightly larger to cradle the body. Deflated size, 32" x 48". One-piece metal type valve (no cap to lose) in one corner. Wt. 1 1/2 lbs. **\$10.00**

HOLUBAR 1215 Grandview Avenue **BOULDER, COLORADO**

Add Length Bag Showing Part-Length Bag and Hood Assembled

ADD-LENGTH SLEEPING BAG designed especially for children to serve throughout the growing period. The basic section also is used by adults along with a down jacket. Made in three sections which lace together with a wide 2" overlap to insure warmth. Each section may be purchased separately as needed. Cross-wise box construction of 11-A nylon filled with 100% goose down. Red or blue. Hand washable.

BASIC SECTION. 52" long. 50" girth at top tapers to 39" girth at foot. 1 lb. of down. Extra thick insulation around hips and shoulders. Rolls into its carrying bag 6" x 11". Wt. 30 oz. **\$35.00**

INSERTABLE MID-SECTION. 18" depth by 50" girth. 5 oz. down. Wt. 12 oz. **\$14.50**

HOOD. Laces to basic section or mid-section. Gives complete head and shoulder protection. Can be left flat or pulled tight around face. Wt. 6 oz. **\$8.50**

ENTIRE ADD-LENGTH ASSEMBLY. Wt. 3 lbs. **\$55.00**

SLEEPING BAGS

The present stock of U.S. Army surplus double arctic bags are some that have been in a warehouse in the Aleutians. They are brand new and still packed in their original cartons. Although the price is higher than it used to be, these bags are still the best buy on the market today. The quality is excellent. The pre-war wholesale price of this double arctic bag was over \$52.50. The stock has been carefully selected to include only top quality bags, most of them made by the Arctic Feather and Down Sleeping Bag Company.

1. **REGULAR ARCTIC DOWN AND FEATHER SLEEPING BAGS** consist of two bags, each filled with 40% waterfowl down and 60% waterfowl feathers. The buoyancy of the feathers helps to keep the down from becoming matted. There are no cold length-wise seams in these bags. The outer bag is about rectangular in shape with a continuous zipper down one side and across one end. It can be opened flat and used as a quilt on a bed. The inner bag is mummy-shaped, which gives the greatest warmth for the least weight. These inner bags will accommodate a person up to 5' 10" in height. The bags are ideal for varying temperatures. The rectangular bag is good for moderate nights; the zipper can be adjusted for comfort. For colder nights the mummy bag is used, and for very cold nights both bags are ideal.

Double Arctic Bag in waterproof carrying case.	Weight 10½ lb	\$44.50
Inner Mummy Bag only	Weight 5½ lb	\$28.50
Outer Rectangular Bag only	Weight 5½ lb	\$25.50

32. 50

2. **AIR CORPS PURE DOWN DOUBLE BAGS** have both the inner and the outer bag in rectangular shape with a zipper down one side and across the bottom.

Double Air Corps Bag	Weight 9 lb	\$55.00
Single Rectangular Air Corps Bag	Weight 4½ lb	\$28.00

3. **U.S. NAVAL OFFICER'S DOWN SLEEPING BAGS** are luxurious built somewhat on the scale of the Woods Bag, and are not intended for those who back pack everything that they need. The shape is about rectangular with a zipper opening half of the way down one side. An inner down quilt can be used over or under the sleeper. At the head end a zippered compartment can be used for storing pillow and sheets. Two sheets which tie into the bag are included.

~~U.S. Naval Officers' Down Bag — Weight 10 lb without sheets \$68.50~~

4. **USED MUMMY DOWN FEATHER BAGS** (Mountain Bags) in excellent condition, will accommodate a person up to 5' 10" tall. Weight 5½ lb. \$19.50

5. **OUTER MUMMY-SHAPED WATER-REPELLENT COVERS.**

Weight 2 lb	\$4.50
------------------------	-------------------

6. **INNER SHEET LINERS FOR MUMMY BAGS** Weight 1¼ lb. \$0.95

7. **WOOL BLANKET MUMMY SLEEPING BAG.** This bag has a zipper opening and can be used by itself, in a water-repellent cover, or as a liner in a mummy down and feather bag. Weight 3 lb \$3.25

8. **"ICELANDIC" MODEL PURE DOWN SLEEPING BAGS** made in England by a famous outfitter of many expeditions such as the Everest and K-2 will be in stock soon. If your order is placed now, delivery can be expected in about eight weeks. Write for details.

AIR MATTRESS

This sturdy air mattress is light-weight. Made of vinylite plastic in sections 2 feet by 2 feet when inflated. The sections snap together to form a ¾ length or full length mattress. The tubes are crosswise to prevent rolling. Can be used down to about -25°F. Weight per section 14 ounces.

1950 no french nylon
no bags made by Alice

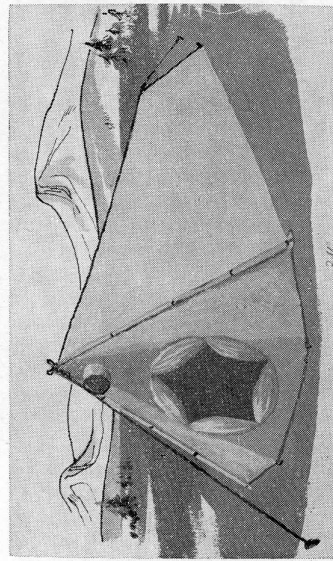

ROYALIGHT TENT. Selected for display at the American National Exhibit in Moscow. Ultra light-weight with room to accommodate comfortably two people and their gear. The width of the sewed-in coated nylon floor tapers from 5 feet near the entrance to 4 feet at the rear. The floor is 7 1/2 feet long from entrance to rear. The 4 1/2 foot high peak is provided with a hooded insect-proof ventilator. The 20" rear peak, supported by an external back pole, together with pull-out tabs on the side walls provides maximum useable space within. The storm-proof canopy type door covers the convenient zippered nylon net entrance and fastens securely over the entire front of the tent, extending to the side ridges, which are best held taut by the quick and easy-to-use sectional aluminum "A" poles. This front closing can be rolled up or tied out like a canopy to shelter the entrance. All points of strain reinforced. Tape reinforced center ridge. To our knowledge, this is the lightest, most roomy two man tent available. This tent requires a minimum of eight stakes — see page 21.

—Made of lightweight nylon 11-A. Weighs only 2 1/2 lbs. Highly puncture and tear resistant. Rolled size with poles, 24" x 5". Non-sweating. Silicon treated for high water-repellency. Although most tents of this fabric have been excellent in hard rains, the fabric sometimes may ooze in a hard rain with inside rubbing. Many people, however, feel that the wonderful light weight of this tent is worth the occasional use of their poncho or some weather balloon as a fly. Red or blue. Price without poles **\$65.50**

—Also available in highly rain-tight dacron cotton DC 70. Will keep you dry even in prolonged wet spells. Non-sweating. Red or tan. Rolled with poles 25" x 5 1/2". Wt. 5 lbs. Price without poles **\$65.00**

—Set of sectional aluminum poles, not needed in wooded areas. Wt. 16 oz. **\$9.00**

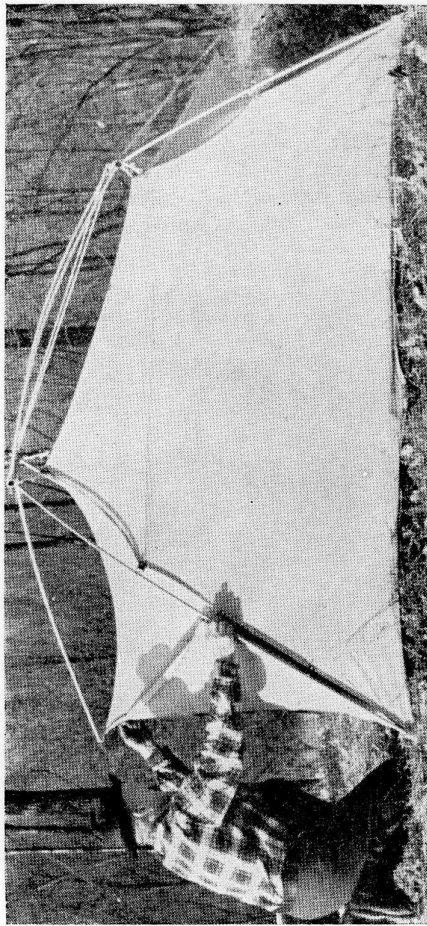

TETON TENT. Light weight with adequate room for two, luxurious room for one and his duffel. Coated nylon floor is 88" long by 52" wide tapering to 38" wide at rear. Nylon mosquito netting on both tunnel entrance and tunnel ventilator insures a weather-tight and insect-proof tent. Entrance mosquito netting ties up when not in use. Large tunnel entrance permits easy access and rolls up into narrow "collar" when desired. 46" peak falls to a triangular 16" rear wall supported by outside back pole. All points of strain reinforced. Strongly reinforced center ridge. Easy and quick to pitch "A" frame. Made of extremely rain-tight dacron cotton DC 70. Non-sweating. Red or tan. Wt. 3 lbs. Rolled with poles, 19" x 5". Requires minimum of 8 stakes—see page 21. Price without poles **\$40.00**

Set of sectional aluminum poles, not needed in wooded areas. Wt. 14 oz. **\$8.00**

HOLUBAR

1215 Grandview Avenue

BOULDER, COLORADO

DRAW-TIGHT TENT. This uniquely designed tent gives luxurious room for two men and their duffel and ample room for three men. It is completely suspended from a jointed aluminum framework made of corrosion-proof tempered aluminum alloy. Frame sections are mostly interchangeable for ease in erection. The frame sets up under compression and keeps the sewn-in floor spread flat at all times. Elastic shock cords and simple brass hooks hold the tent snugly to the frame and absorb wind and rain shock. The tent can be picked up and moved with no trouble. The three-way zippered nylon netting door and unique zippered nylon netting vent window at the rear provide complete insect protection yet insure air circulation in even the heaviest storms. Zippered weatherproof storm door. Made of fine, light weight, long staple cotton specially treated for water repellency and mildew resistance. Sewn-in vinyl coated nylon floor is 5 feet wide and 7 feet 9 inches long. Height in front 48" dropping to 30" in rear. Weight complete with frame, storm ropes, stakes and carrying bag is 18 pounds. Rolled up size, 24" x 9". **\$80.00.** Lightweight Egyptian cotton. 12 lb. **\$120.00**

HOLUBAR TIE-TARP TENT. Light-weight, practical, and versatile. 7'6" x 10' tarp of tough coated nylon. Tie tapes sewed to reinforced areas every 2 feet along edges. Grommets at each corner. Sleeping tent, dining shelter, windbreak. Wt. 32 oz. **\$22.00**

ALUMINUM TENT STAKES made of 1/4" aluminum alloy. (Pictured on page 22.) Approximate 6 inches long. U-shaped for greater holding power and easy insertion in rocky ground. Wt. 1 oz. **\$.30**

MUCKLUKS (pictured on snowshoe). Useful in affording a change from boots after climbing or skiing. Made especially for winter use of mountain troops. Buckskin leather foot, 16"-high canvas tops with laces to draw up snugly around foot and leg. They can be water-proofed with Fumol listed on page 19. They come with one pair of insulating insoles in small, medium and large size. Weight, about 3/4-lb. Price per pair **\$2.00**

Extra insoles, per pair **\$.35**

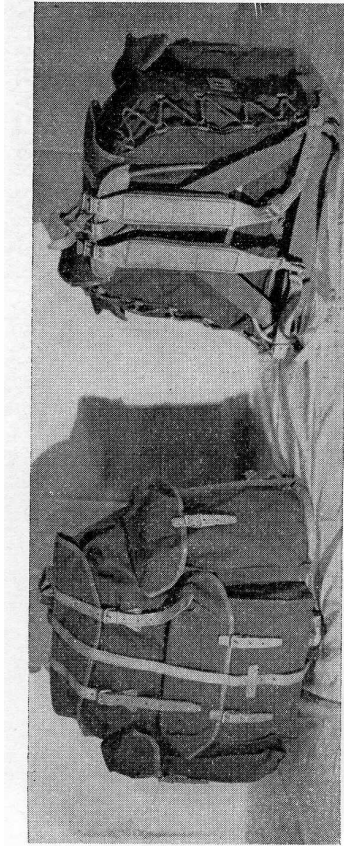

BEAR PAW SNOWSHOES with built-in binding. This type is ideal for late winter and early spring mountaineering, where one has to travel over irregular terrain in dense growth. When not being worn, they pack easily. Best quality materials and workmanship. Size, 13" x 28". Weight, about 5 1/2 lbs. with binding. Selected used **\$15.50**

ALASKAN TRAIL SNOWSHOES. White ash frames. Non-sag laces waterproofed with special varnish. 10" x 62". Wt. about 5 3/4 lbs. without bindings. Trial model snowshoe bindings. Wt. 3/4 lb. **\$22.00**

HOLUBAR

1215 Grandview Avenue

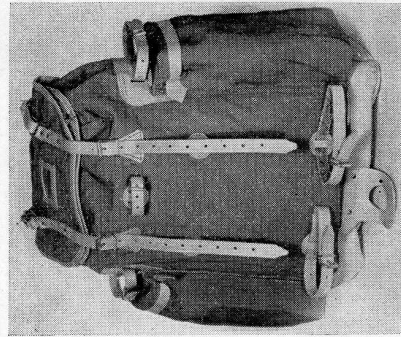

BOULDER, COLORADO

LA FUMA, TENSING MODEL. A beautiful, rugged, and versatile pack that the French call a life-time rucksack. Tensing used this model on the first ascent of Everest. The large capacity can be varied a full six inches in circumference by a lacing on each side. A body strap with snap and a vertical anchor strap to keep the load close to the body are carrying aids. There are three outside pockets, the center one with zipper closing, an inside pocket, and a zippered pocket under the lid. Chrome leather bottom and straps with stainless steel buckles blend handsomely with tan water-repellent duck. Edges inside and out are all bound. Felt-lined shoulder straps. One-piece tubular steel frame. 18" x 20" x 7". About 5 lbs. \$25.50 plus 10% tax **\$28.05**

LA FUMA MEDIUM MODEL. Like Tensing Model but without adjustable width feature, body and load straps. Smaller dimensions: Height 16", width of bottom, 16½", depth of bottom, 6½". Including tax. **\$20.35**

LA FUMA, SKI-MOUNTAINERING MODEL. Designed by the famous French guide, Gaston Rebuffat, this superb pack has proved a most versatile and popular pack for year-around mountaineering. Same high quality materials and craftsmanship as other La Fuma models. Flexible frame has two vertical removable stays to insure comfort with any load. Steel band across bottom is bowed by adjustable web strap to balance load and form a cooling air space. Unique bellows lid forms a large compartment with zippered opening along one edge allowing access without loosening straps. Two (2" x 6" x 11") leather reinforced side pockets form channels for carrying skis. Ice axe carrier and crampon straps. Other leather tabs for carrying rope, etc. Inside pocket. "D" ring at top. Body strap. Leather bottom 14" x 4½". Height 18". Weight 3 pounds. \$24.50 plus 10% tax. **\$26.95**

"BACKPACKERS!" We consider the KELTY PACK the finest lightweight pack board obtainable for trail hiking. For complete information and purchase write to: A. I. Kelty Mfg. Co., P.O. Box 3453, Glendale 1, California.

U.S. ARMY TUBULAR FRAME RUCKSACK. A large-size strong tubular frame rucksack with three outside pockets and a zippered pocket inside the cover. Made of water-repellent duck with web shoulder straps. Weight 4¾ lbs. Satisfactory and serviceable for **\$12.25**

U.S. ARMY PLYWOOD PACKBOARD. A proved excellent board for ease in carrying heavy loads and odd-shaped articles. Made of plywood with a laced duck back and four hooks on each side for lashing load to board. Air space between duck and board cools and cushions carrier's back. Size 15" x 24". Weight 4½ lbs. Selected used **\$6.00**

Brand new

HOLUBAR

BOULDER, COLORADO

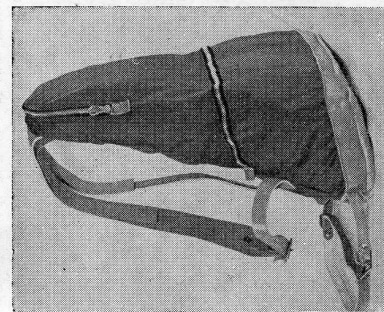

BERGANS LATEST MODEL RUCKSACK. This radically improved design of the original Norwegian frame pack allows greater loads than ever before possible to be carried comfortably with a rucksack. It is especially suited for persons 5'8" and taller. The top of both the frame and pack, being wider than the bottom, allows the main load to ride high across the shoulders where it can be carried with the least effort. Water repellent gray-blue duck has matching chrome-tanned leather straps and binding. Bottom of the tubular frame is contoured and has a web band which distributes the load and forms a cooling air space. Two 5" x 10" outside pockets and a zippered pocket under the large cover. Large frame is 17" high; small one is 16" high. Specify regular or small size, Wt. about 4½ pounds. \$21.50 plus 10% tax. **\$23.65**

BERGANS ACCESSORY STRAPS for fastening sleeping bag, etc. pair **\$1.60**

BODY STRAP for around waist **\$1.20**

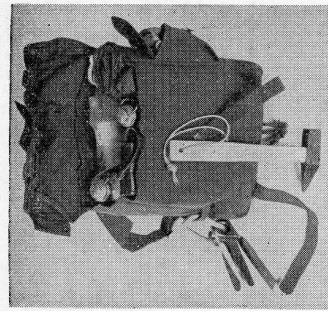

LA FUMA, GUIDE MODEL. Also designed by Rebuffat, this pack has the same high quality materials and craftsmanship as other La Fuma packs. Larger than the Contour pack. No frame. Chrome leather bottom 12½" by 5" extends 4" up sides for extra strength. Height 17". Felt-lined adjustable leather shoulder straps. Three inside pockets. "D" ring. A fine large-size climbing pack. Wt. 2¼ lbs. \$12.50 plus 10% tax **\$13.75**

CONTOUR CLIMBING PACK. Specifically designed for climbing and skiing to fit the back and ride with ease. It is 17" high with a 6" x 12" leather bottom, which tapers to a thin rounded top. The center partition keeps the shape of the pack and distributes the load as well as keeping it within handy reach. Four holders for straps on the outside provide for carrying rope. Made of beautiful water-proof tough nylon duck with wide non-stretch leather straps and rust proof hardware. Weight, 16 oz. Price, including tax **\$13.75**

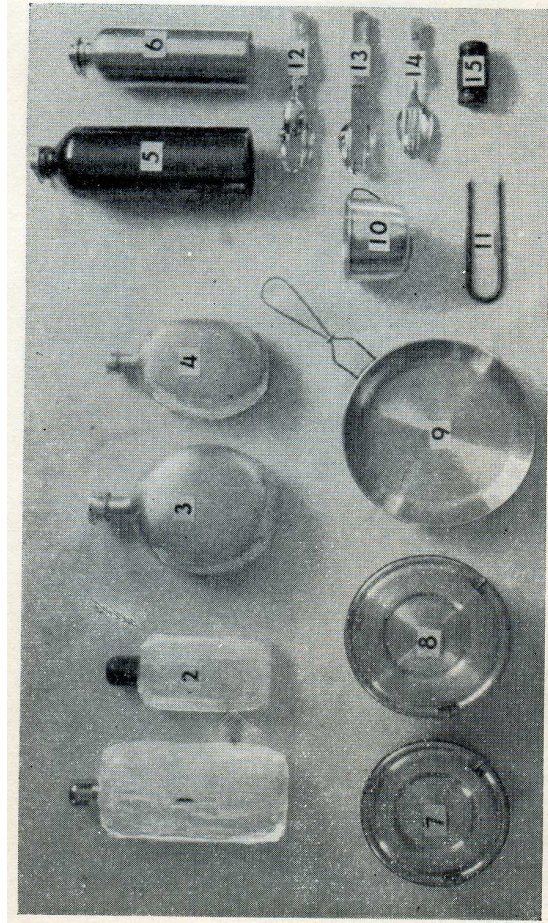

SMALL FRAMELESS PACK. A rugged, well-designed climbing pack especially suited for short trips. Made of water-proof duck and first-quality fittings. A double vertical partition on the inside forms four versatile pockets which keep articles separated and readily accessible. If the load is only partial, this pack is so designed that it rides with the weight nicely distributed close to the back. One outside pocket for gloves, compass or other small articles. Outside strap and provisions for carrying rope. Adjustable two-inch wide shoulder strap with snaps to "D" rings at bottom of pack. Dimensions: 14" x 14" x 4". Weight 22 oz. **\$4.75**
